EDUCATION

University College London

Bachelor of Science, Computer Science (89.15% avg)

V High School in Cracow

GPA 5.55, Top 1% in Math/Physics/CS (A A* A* equiv.)*

Sept. 2024 – June 2027

Great Britain, London

Sept. 2020 – Apr. 2024

Poland, Cracow

PROJECTS

Carbon optimized AI workload scheduling (*C++*, *Drogon*)

Sept. 2025 - Mar. 2026

- Developed a C++23 web app to minimize AI carbon emissions via global datacenter scheduling.
- Optimized workload execution using dynamic programming to select the greenest time and location.
- Implemented a lock-free architecture to manage shared state across high-concurrency threads.
- Vectorized performance-critical code using AVX-512 for SIMD parallelization.
- Leveraged C++23 coroutines and engineered a custom *when_all* asynchronous primitive.

Verified Market Simulator Research (*OCaml*)

Jan. 2026 - Present

Ongoing

- Architecting a purely functional LOB simulator in OCaml 5.0 using immutable structures to eliminate state drift.
- Leveraging Polars to transform LOBSTER CSVs into binary formats for parallelized HPC backtesting.
- Implementing a low-latency streamer for Cboe Titanium BOE frames using TCP sockets and zero-copy parsing.
- Formal Verification using QCheck to mathematically prove matching engine's fairness and price-time priority.

EXPERIENCE

IMC Trading — Software Engineering Internship (*Summer 2026*)

Huawei — Programming Language Research Intern (*Cangjie*, *JavaScript*)

Jun.2025 - Sept.2025

- Built an AI agent based cross-platform browser automation tool.
- Developed a computer vision module for interpreting distorted visual classification tasks in browser.
- Packaged in Docker for OS- and CPU-agnostic deployment, simplifying environment setup.

IMC Trading — Launchpad Technology Insight Program

Jun. 2025

- 4th place in algorithmic optimization challenge.
- 6th place in speed coding challenge.

Discover Citadel — Insight Program

Mar. 2025

- 1st place in the quantitative research challenge, a team-based probability competition.

COMPETITIONS & AWARDS

- | | |
|--|------------|
| • 5th in Poland in group competitive programming contest. | 2023 |
| • 8th in Poland in solo competitive programming contest, Diamentowy Index AGH. | 2024 |
| • 11th in UK & Ireland Programming Contest for University students (UKIEPC). | 2025 |
| • 27th in UK based on Codeforces ranking. | Present |
| • Top 50 in Northwestern Europe Regional Contest (NWERC). | 2024, 2025 |
| • Distinction in National Polish Computer Science Olympiad. | 2023, 2024 |

LEADERSHIP

Captain of competitive programming team for 3 years.

President and Founder of a Competitive Programming Society at UCL hosting lectures and workshops.

SKILLS & LANGUAGES

Programming Languages: Advanced C++ and Java, C, Haskell, Ocaml, Python, SQL and Bash.

Algorithmic knowledge: Centroid decomposition, Heavy-Light Decomposition, FFT & Aho-Corasick to name a few.

Languages: Native Polish(C2) and English(C2).
